

CARTAR - Econo Wheel Kit

5 mm

25 mm

The Cartar Econo Wheel Kit is designed for the Mobile workshop . Unlike a commercial floor surface , the Mobile workshop will need to deal with a range of challenging surfaces when reaching out to clients in their homes or at their work places . The operator must be able to move and position his Econo Lift in a smooth and professional manner . The twin wheels on the handle are extra wide to give stability at all angles and when pulling back .The 2 rear wheels are assembled in a very unique frame that allows 2 height settings for adequate ground clearance .Smooth and Professional This is vital for the Mobile guys to to bring a Cartar Lift "On Site ".
